Intuitive Therapy

With our Intuitive Therapy we have decided to forgo the usual choreographed treatments, allowing our therapists to work closely with you to discover your needs and wants. We believe this will create a healing space for both yourself and your therapist to establish an increased awareness of your mind/body connection. Intuitive Therapy can include focused massage on areas that require detailed attention, reflexology, and energy work that would be the most beneficial for you.

Massage Therapy from Around the Globe

Balinese is a full body, relaxing medium tissue holistic treatment. It uses a combination of gentle stretches, acupressure and smooth flowing massage techniques to stimulate the flow of blood, oxygen and energy around your body, and bring a sense of wellbeing, calm and deep relaxation.

Thai Massage combines gentle or strong, yoga-like stretching. It is often called the 'lazy man's basic yoga'. It works with muscle compression, joint mobilization, and acupressure of the muscles, tendons, pressure points, and energy lines leaving you refreshed and energized.

Indian Head Massage focuses on your head, neck and shoulders, leaving you deeply relaxed yet energized. Indian Head Massage is an ancient therapeutic treatment that has been practiced in India for thousands of years and is incredibly relaxing. It is part of the Hindu holistic wellness practice of Ayurveda.

Swedish Massage is the best known type of bodywork performed today. One of the primary goals of Swedish massage is to relax the entire body, focusing on improving circulation of the blood and lymphatic system and relaxing muscles using a specific set of massage movements: effleurage, or sliding movements; petrissage, or kneading movements; friction or rubbing; vibration and percussion. It traditionally includes passive and active joint movements, stretching and bending joints with the assistance of the massage therapist.

Deep Tissue Massage focuses on stretching the fascia, a web of connective tissue that surrounds, supports and accesses all your muscles, bones, nerves, and organs. This massage technique works layer by layer through connective tissue and muscles; down to the deepest accessible layers to assist in correcting posture and to create increased freedom of movement.

Hot Stone Massage uses smooth, heated volcanic stones as an extension of the therapists' own hands, or by placing them on the body. The heat can be both deeply relaxing and help warm up tight muscles so the therapist can work the muscles deeply. This therapy melts away tension, eases muscle stiffness and increases circulation and metabolism.

Pre/Post-Natal Massage is a wonderful choice for prenatal care. It has been specially designed for the pregnant or nursing mother to improve overall health, reduce stress and relieve muscle tension during this very special time.

Scrubs and Wraps

Sodashi Detoxifying Marine Body Wrap combines the richness of marine plants, algae, marine minerals and plant essences to deeply detoxifying the body. A full body exfoliation with Sodashi's Organic Green Tea Salt Therapy Exfoliate softens the skin before a warm Sodashi Marine Body Mask is applied, and the body is cocooned in a comforting wrap. A soothing scalp massage is performed for complete comfort and total relaxation. To finish, a revitalizing lotion is massaged into the skin to leave the body feeling completely rejuvenated.

Sodashi Refining Body Toner begins with a full body exfoliation with Sodashi's Jojoba Bead Body Polish, followed by the application of a nurturing full body mask and comforting body wrap. A scalp massage is performed to complete the feeling of total relaxation. Sodashi's Refining Body Mask, rich in French Pink Clay and herbal extracts firms, tones, and conditions the skin. This rejuvenating therapy is extremely beneficial in the treatment of scar tissue and stretch marks; it is safe and effective during pregnancy.

Sodashi Jetlag Recovery is a balancing treatment for the face and body, it boosts and re-energizes the body's systems after travel. To reduce jetlag and fatigue a relaxing back massage is performed followed by a Himalayan salt exfoliation and warm aromatic compresses. This deeply reviving treatment is completed with a refreshing mini facial and application of Sodashi's signature Jetlag tonics.

Sodashi Sun Soother uses soothing compresses of lavender and geranium plant essences gently placed over your body to calm redness and irritation. A cooling mist is spritzed on the skin to reduce body heat. Selections of treatment lotions are then applied to activate skin rejuvenation, moisturize, even the skin tone, and prevent any skin damage.

Soneva Jani Spa Coconut Scrub is our local addition; a soothing and nourishing body therapy using coconut extracts to polish, while an application of virgin coconut oil reveals soft and radiant skin. Add on any of the following 30-minute treatments to create your own special package to suit your individual needs.

Sodashi Scalp Treatment is a luxurious and moisture-rich Sodashi scalp mud that is massaged into your scalp, helping to release pressure and tension. This treatment helps to balance and cleanse the scalp, as well as encouraging healthy hair growth.

Foot Massage Treatment is performed on the soles of your feet to create a profoundly relaxing experience.

Back, Neck & Shoulder Massage focuses on the typical stress and tensions points.

Express Facial includes a cleanse, exfoliation, and massage, leaving you feeling refreshed and radiant.

Ayurvedic Therapy

Abhyanga is an ancient Indian oil massage therapy for deep relaxation and healing. It gives a feeling of stability and warmth while decreasing the effects of aging, increasing circulation, aiding in detoxification and leaving your skin soft and smooth.

Shirodhara pours warm herbal medicated oil over the third eye chakra, the vital energy point located in the centre of forehead. It helps improve blood circulation, increase oxygen levels, nutrients, and energy flow to the brain, activating depressed areas of the brain, alleviating fatigue, depression, mental stress, and improving concentration.

Podikizhi Therapy involves small linen bags filled with medicated powder, made from different herbal plants, which are heated and applied all over the body to induce sweating. The bags are applied on different parts of the body to relieve joint and muscular pain, stiffness, numbness, disc problems, arthritis and different paralytic conditions, improve circulation and reduce swelling.

Nidraasana Sleep Ritual

We recommend you book this treatment no earlier than 16:00 to experience the full effects for a good night's sleep. The Nidraasana Sleep Ritual is Soneva Spa's very own luxurious bespoke treatment that was created to improve your sleep quality. This treatment is ideal for jet lag, mild insomnia, people who suffer from irregular sleep patterns, and anyone else who wants better quality sleep.

The massage ritual starts off seated with a specially made foot soak and scrub followed by an Ayurvedic herbal hot compress applied to the upper body, which is followed with acupressure, reiki, and chakra stones. A full body massage follows, using our secret combination of sleep-enhancing ingredients in our very own bespoke massage oil, foot spray, oil incense, essential oils, chakra drops and room mist.

This indulgent and luxurious treatment is concluded by manipulating facial pressure points and an Indian Head and Scalp Massage, finally ending with Reiki, moving from the head to the feet for a resplendent and profound sense of relaxation and readiness for a good night sleep.

We recommend an in-villa bath with our Bath Sleep Salts directly after the massage ritual to perfectly enhance the effects of this wonderful treatment.

Reiki

'Rei' means universe and 'Ki' means energy

The ancient traditional hands-on energy treatment from Tibet was rediscovered in the early 19th century by Dr. Usui of Japan. It is conducted through the clothes and therefore non-intrusive, allowing the recipient to receive a subtle but profound energy flow from the therapists hands on the areas connected to the seven main chakra points. This treatment brings the recipient into a deep Alpha state of para-sympathetic recovery and relaxation, which enables better quality sleep, a calmer state of mind, an enhanced sense of wellbeing and mild detoxification benefits.
