CORAL ADOPTION PROGRAM

Beneath the shimmering waters that surround the island of Kandima in Dhaalu Atoll region, a fragile world quietly rebuilds itself. Coral reefs, the most diverse type of marine habitat, protect the pristine beaches at Kandima Maldives and guard the islands' crystal-clear lagoon. They also support an astounding array of tropical fish, crustaceans and bizarre-looking molluscs, however for all of its beauty and apparent resilience, coral is a sensitive organism, vulnerable to extreme weather and sudden environmental changes.

Sponsor a frame, participate in reef creation and contribute to the ongoing conservation effort by adopting a coral frame. Take part in the Coral Adoption Program by transplanting coral onto your frame with the help of our resident Marine Biologist in the shallow waters of the lagoon. Three different frame sizes are available for adoption:

- Small \$60
- Medium \$80
- Large \$120
