## Introducing Kandima Maldives

Our tropiKal Island (Desti)nation is approximately 3km long with the northern end of the island currently undeveloped – the perfect place to take a picnic for a true Robinson Crusoe experience!

## Getting Here

Guests have the choice of travelling to us by either a short, 30 minute domestic flight and speed boat combo or a 40 minute seaplane flight. Both air transfer options are operated by Manta Air and schedules are fixed for both. We are able to confirm the exact time of flights prior to guests' arrival. The domestic flights will land at Dhaalu Airport followed by a 20 minute speedboat transfer to the resort. These flights can operate after dark. The seaplanes can only take off and land in daylight hours and will generally land in our lagoon. It's worth to note not all flights come direct and sometimes it may be necessary to make another stop en route.

# Our Kool & Stylish Accommodation

## Rock in & Rock out times

We do not have fixed times to Rock-in and Rock-out (check in and check out). Instead a room will be allocated as close to the arrival time as possible and guests will have the room based on a full 24 hours cycle. Rock out on the day of departure will be at the same time of rocking in!

## Sky & Beach Studio

Sky Studios are on the upper floor whilst Beach Studios are on the lower floor. Built without connecting walls, located in buildings comprising 4 units, each unit separated by the staircase.

## Beach Villa

We have 3 different types of Beach Villa. The Villas themselves are identical, it's the location and inclusion of a swimming pool which makes them different.

Sunrise and Sunset Beach Pool Villas - identical to the Beach Villas with Swirlpool but come complete with a private swimming pool. As the name suggests, they are located on the Sunrise or Sunset sides of the island. For avid swimmers, the Sunset side will be more suited as the reef is close to the Sunrise side.

These villas are located along the shoreline on the East Coast of the island and are built over the reef with only the sound of the crashing waves to send you off to sleep.
